Easier-care WCs for everyone.

When choosing a WC, these days ease of care and pristine hygiene are playing an increasingly important role alongside great design. Keramag presents the new generation of easy-care WCs: the Rimfree® WCs. Developed in the style of the Keramag bathroom series, tailored to special requirements, fitted with features such as automatic soft-close WC seats or water-saving 4.5 litre flushes – and, above all, with no rims. Discover the benefits and variety of Keramag Rimfree® WCs.

Keramag, the highly innovative brand.

Keramag products meet the highest standards of design, comfort, functionality and unique creative versatility. The incredible innovative drive of the brand and its more than 110 years' worth of experience is demonstrated over and over again in innovative developments that set new standards and make life easier.

Keramag is a leading German manufacturer of high-quality sanitary ware and belongs to the dynamic international Sanitec Corporation network.

Rimless WCs – the new standard for modern bathrooms.

With Rimfree®, the innovative technology for rimless WCs, Keramag is setting the bar higher in terms of hygiene and ease of care – both in private bathrooms and public properties. With no rims, there are simply no more hidden, difficult to clean cavities and the inner basin can easily be kept spotlessly clean. This saves time, water and detergent – and also protects the environment.

The benefits of Rimfree® at a glance.

- Flawless hygiene
- Easy to care for and clean
- Patented flush distributor
- Ideal flush water guide
- Attractive inner basin design
- Saves time, water and detergent
- Protects the environment

Award 2012

Simply easier to clean.

It's easier to remove things you can actually see. Soiling is more obvious in a WC with no rim. Now nothing can take hold in unseen places. Soiling is removed in no time and the basin is quickly made clean and pristine again.

At last – hygienically perfect and environmentally friendly.

Where there is no rim, no deposits can form either. This saves you arduous cleaning, the use of aggressive detergents and unpleasant odours. The Keramag Rimfree® WCs offer perfect WC hygiene, providing lasting relief for our waters.

Optimal water guide.

Rimfree® flush technology meets the highest standards of form and function. The key advantage is in the design: the innovative technology we use precludes the formation of cavities in which deposits and dirt traps can occur. A patented flush guide carries the water symmetrically around the basin, ensuring flawless flushing and rinsing. Ideal for the best flushing results.

Rimfree®, the new easy-care system for every bathroom.

The range of rimless Keramag Rimfree® WCs is huge. There are:

- WCs in wall-hung and floor-standing versions
- modern rounded and streamlined, angular shapes
- a rimless wall-hung WC for WC areas without barriers.

They complement the Keramag bathroom series and can easily be installed with Keramag System pre-wall elements.

This variety means the new easy-care system can be tailored to meet your personal design needs and ideas.

Concealed fixing systems also provide smooth, easy to clean ceramic surfaces. The rimless WCs are also made even easier to maintain thanks to the optional KeraTect® special glaze, which further reduces cleaning time. This means that Rimfree® WCs can meet even the highest demands of quality and convenience. In every bathroom.

Rimless and barrier-free – a clever combination.

Easily reposition yourself from a wheelchair. Stay independent and self-sufficient. And combine the perfect, rimless WC hygiene with modern, attractive design.

With the Rimfree® wall-hung WC with 700 mm projection, Keramag has developed a WC that meets the high standards of barrier-free bathroom fittings, is easy to clean and fits harmoniously into the room.

Rimfree®:
rimless WC hygiene

The variety of unique possibilities.

Round or square design, tailored to personal desires or special requirements – the variety of Keramag Rimfree® WCs makes it easy for you to find exactly what you want.

4-time award winner.

The rimless iCon wall-hung WC won the international PLUS X AWARD for innovation in 4 categories – Innovation, Quality, Design and Functionality.
